<https://cameron-edek-poole.netlify.app/> 

---

**Summary:** A front-end web developer and philosophy graduate with an affinity for problem solving. Quick and adaptable learner for all things technology related; self motivated with an ability to work independently or as part of a team. Currently enrolled in an intensive 16 week front-end web development bootcamp provided by Trilogy Education.

**Technical Skills:** HTML, CSS, JavaScript, UX Design, CSS frameworks (e.g. Bootstrap), version control via git and GitHub, JS libraries (e.g. React.js and jQuery), node.js and node package manager (npm), AJAX, object-oriented programming (OOP) foundations, deployment with Netlify.

**Soft Skills:** Creative thinker and problem solver, constant learner, time-management, teamwork, communication and organisation.

## PREVIOUS PROJECTS

**Personal Portfolio** | GitHub: <https://github.com/cedekpoole/react-portfolio> | Deployed: <https://cameron-edek-poole.netlify.app/>

Current portfolio with a home, projects, about and contact section.

- Technologies used: React.js, node.js and npm (emailjs, react-bootstrap, react-router-dom packages), JavaScript, Netlify, Bootstrap and vanilla CSS.

**Music Dashboard** | GitHub: <https://github.com/cedekpoole/favourite-music-dashboard> | Deployed: <https://cedekpoole.github.io/favourite-music-dashboard/>

A music app that allows users to effortlessly look up lyrics.

- Core responsibilities: Dealt with local storage; dynamically generated favourite song cards (via jQuery); added functionality to said cards (delete songs individually or collectively and stop duplication); general refactoring of code base; formulation of README.md file
- Technologies used: jQuery, AJAX, Javascript, HTML, CSS and Bootstrap

**Weather App** | GitHub: <https://github.com/cedekpoole/weather-dashboard> | Deployed: <https://cedekpoole.github.io/weather-dashboard/>

An app that displays current and forecasted weather dynamically via data retrieved from server-side APIs.

- Technologies used: HTML, CSS, Bootstrap, Javascript, AJAX, jQuery, moment.js, OpenWeather API and Giphy API

**Team Profile Generator** | GitHub:

<https://github.com/cedekpoole/team-profile-generator>

This application dynamically generates an HTML document based on the user's answers to command line prompts.

- Technologies used: Javascript, object-oriented programming (OOP) via JS classes, node.js and npm (file system, path and inquirer packages), Bootstrap and Jest (Test Driven Development - TDD)

## EXPERIENCE

**Internet Safety Evaluator** | Telus International.

2021-2022 FREELANCE

Part of the AI community where our analysis of data was used to improve the client's machine learning models.

- Tasked to help client train their content to build better AI
- Analysing and reviewing potentially harmful or misleading data to protect users from viewing unsuitable material on the web

**Internet Bidding Operative** | Crows Auction Gallery

2020-2022 FREELANCE

Crows Auction Gallery is a fine art and general auction house, where the main duties entailed moving goods around the property and assisting in online auctions.

- Bidding on behalf of customers on the EasyLive internet bidding platform and assisting with telephone bids as and when required

**Property Maintenance and Refurbishment** | South Terrace Properties Ltd.

2019

Assisted in the maintenance and refurbishment of a couple of properties. Involved in both the physical and administrative side of the business.

**Front of House** | Raven's Ait Island Bar and Venue

2017

Raven's Ait is an island on the River Thames which specializes in weddings and corporate events.

## EDUCATION
